Analysis
Decontamination
Decommissioning
Radiation Protection

OVERVIEW OF OUR SERVICES

Analysis

Our Laboratory

We offer to our customers high-quality analysis using:

- alpha- and gamma spectroscopy
- liquid scintillation counting
- alpha-, and beta- low level counting
- wisp tests
- dose rate determination for radiation protection
- trace analysis in aerosols
- iodine and tritium analysis

On Site Service

Our mobile laboratory allows work on site – everywhere – with state-of-the art detection systems and highly-trained and motivated personnel, which saves you time and money.

Decontamination

We decontaminate:

- tools and small parts
- electronic instruments
- complete systems
- concrete and steel components
- delicate mechanics
- working in sensitive areas
- hot cells
- glove boxes
- laboratories
- waste water disposal line

We are using:

- chemical and
- physical decontamination
- blasting
- broad variety of chemicals and own recipes
- electrolysis
- cavity decontamination

Radiation Protection

NucTecSolutions GmbH is Your professional partner for radiation-protection-service.

- sampling
- environmental monitoring
- free release
- aerial surveillance
- probes for pipes
- dosimetry
- survey monitoring

Our Knowledge and our Know-how for your needs.

We solve your projects, while others still discuss the how to...
